INTRODUCTION
Aufhauser SilverAlloy Cd-25 is similar to SilverAlloy Cd-35, but has a lower silver content and is somewhat more subject to liquation, due to a wider melting range. This filler metal contains cadmium.

APPLICATIONS
SilverAlloy Cd-25 is used for joining most ferrous and non-ferrous metals. Cd-25 has good brazing properties and is suitable either for pre-placement in the joint or for manual feeding into the joint. Although lap joints generally are used, butt joints may be used if requirements are less stringent. Joint clearances of 0.001 to 0.005 in. (0.025 to 0.127 mm) are recommended for proper capillary action.
